BRI

Ultrathin display shrinkfilm on the basis of
bi-oriented polyethylene (BO-PE)
and recycled raw material

- Versatility
- High cohesion strength
- Extremely thin, thus contributing to resource savings
- Recyclable
- Perfectly adapted for the packaging of industrial and consumer goods

The originality of BRI :

- Contains 30% of post-industrial regenerated raw material
- Contributes to carbon sequestration through participation in a carbon-sink forestry project

Disposal

Options for disposal are **recycling** (compatible with SPI code 4/PE-LD), incineration with energy recovery and landfill. Treatment, storage, transportation, and disposal must be in accordance with applicable federal, state/provincial and local regulations.

Food contact

Complies with EU and US regulations on food contact materials.

See the « Declaration of Conformity » of concerned film reference for details.

Film storage

The maximum temperature for storage is 32° C, with a maximum of 80% RH, up to one year.
